YEARS OF INNOVATION SINCE 1825

Two centuries of expertise and innovation

World leader in tableware, the Arc group creates everyday innovative and sustainable glass solutions to enjoy eating, drinking and home experiences.

For nearly two centuries, the Group's story has been forged through countless innovations, driven by the same enthusiasm throughout the years. We have brought fascination back into daily life for countless people by offering increasingly beautiful, practical, resistant, versatile, health-conscious and accessible products.

Founded in Arques in northern France in 1825, Arc continuously innovates with expertise to improve daily life by proposing increasingly durable, safer, more practical, resistant, versatile and beautiful products that are accessible to all.

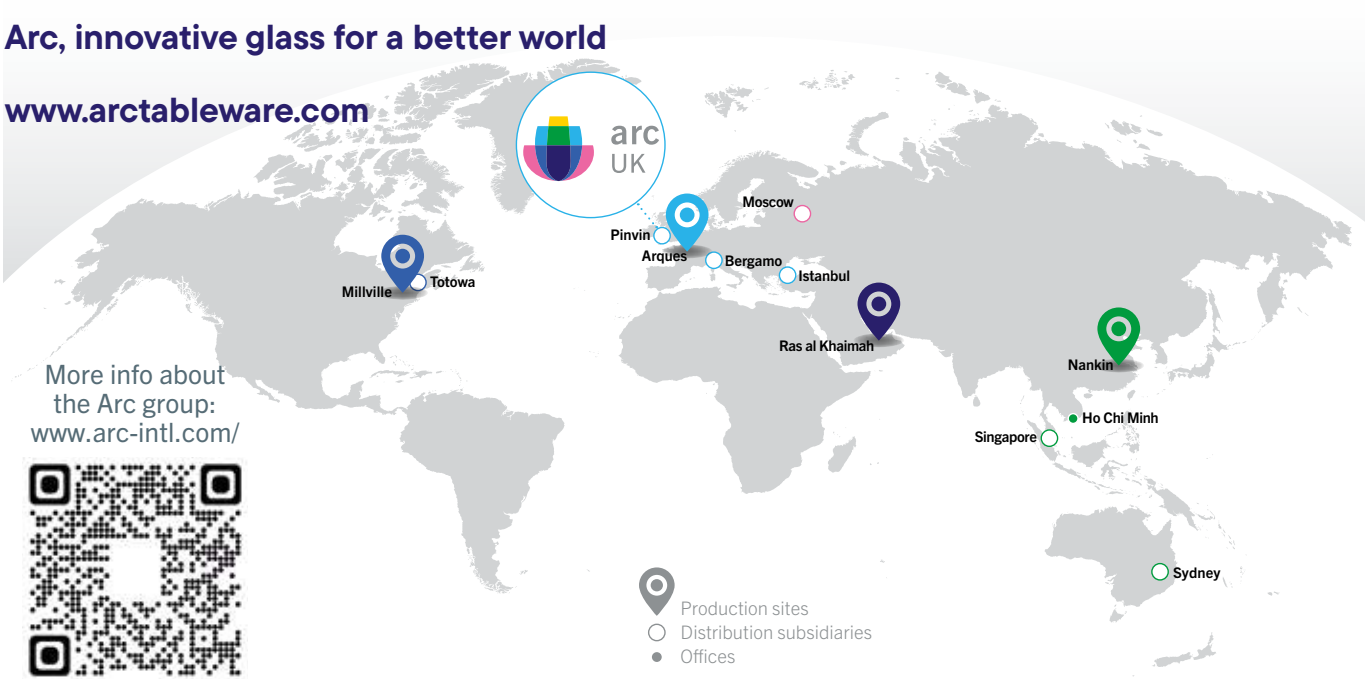

These innovations have led to the development of new brands that have been a constant presence in the daily lives of people all over the world for several generations: Luminarc® and Cristal d'Arques® Paris for the general public and Arcoroc® and Chef&Sommelier® for professionals.

We have 6,100 employees worldwide, including 3,750 in France, and produce 4 million items every day, generating a turnover of €688 million in 2024.

Providing customer support at every stage of a project is a top priority for our teams. From design to after-sales service, we treat our customers as partners.

The ***Exaltation*** collection, made from extra-strong Krysta crystalline glass, pushes the technical boundaries to enhance the tasting experience. Its flower bud-shaped aromatic chamber and the way it delicately deposits the liquid in the mouth exalt the sensations. Particularly appreciated for its rounded bowl, the Exaltation collection is available in both wine and performance flute forms.

EFFERVESCENCE PLUS
A laser is used to create delicate nucleation points within the base of the bowl. These points are designed to agitate the sparkling wine releasing a gentle and constant helix of bubbles, delighting the eyes and taste buds alike.

Decanters for the sommeliers

Chef&Sommelier decanters are useful tools for sommeliers and waiters to magnify wines. Here is how to use them properly.

CARAFES	To decant	To oxygenate

*GRIPPING DOME

To decant:

Effective to remove and retain deposits within the wine, particularly in mature or bio wines.

To oxygenate:

When vigorously shaken, the decanter develops the aromas of young wine, this is due to the angular shape

Arcoroc™ and Chef&Sommelier™ cutlery is **designed** for **intensive and professional use**.

The **reliability** and **durability** is **underpinned by strict specifications and rigorous checks at each stage of the manufacturing process**.

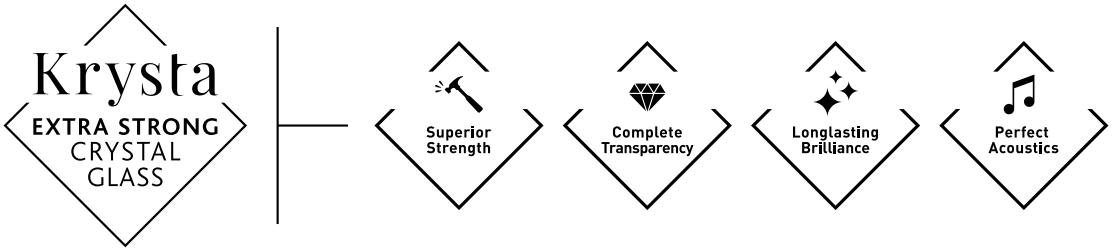

Most of our collections are done in 18/10 - ASI 304 stainless steel, what is ideal for use in **high-quality cutlery and to guarantee resistance**, the thickness of the cutlery is examined in minute detail.
Some of our Arcoroc™ collections are done in 18/0 - ASI 430 performance polished stainless steel, also **resistant and designed for a long life**.

Each piece of our cutlery has been designed to combine **elegance with perfect ergonomics and balance**.

Our cutlery is **wash resistant and respects dinnerware material** by avoiding **scratches**.

The **bending strength and torsion resistance** has been designed to be above the requirements of the industry.

Regarding our knives some are available in both solid handle and hollow handle formats.
Our solid handle knives have been created to balance weight with design and use the finest quality stainless steel.
Our hollow handled knives use the traditional 3 piece composition, highest grade 18/10 - AISI 304 stainless steel handle (2 piece) and high grade (AISI 420) hardened knife blade (3rd piece), to give the optimum in quality, longevity and design. All of our cutlery collections are dishwasher safe.

Gastronomy professionals are searching for glasses that satisfy their needs in terms of **perfection and sophistication**.

Their desire: Splendidly elegant table settings with **fine, lightweight, extremely transparent** products.

Their professional needs: **Intensive daily use** requires products that are **highly resistant to shocks and detergents**.

To meet these twin challenges of **aesthetic excellence and resistance**, the Arc Research Centre is introducing a **new generation of lead-free crystal**: **Krysta™**; The high-performance crystal glass.

SUPERIOR STRENGTH

The Arc Research Centre has developed a crystalline material, Krysta™, combining **superior strength with exceptional finesse**.
Finer and stronger: the Krysta™ innovation.
With a thickness of 1.1 mm at the rim, Krysta™ is 30% stronger*
• **Savings across the entire chain: fewer breakages and chipping during transportation, storage, washing and polishing.**
*than other standard crystal glasses on the market.

COMPLETE TRANSPARENCY

Krysta™ is one of the **purest and most transparent crystal glass** on the market.
The perfect mastery of its composition, the quality of the sand used, and fusion at a very high temperature gives Krysta™ perfect transparency.
• **Tables enhanced by the sparkle of Krysta™.**
• **The visual aspects of every wine respected to perfection.**

LONGLASTING BRILLIANCE

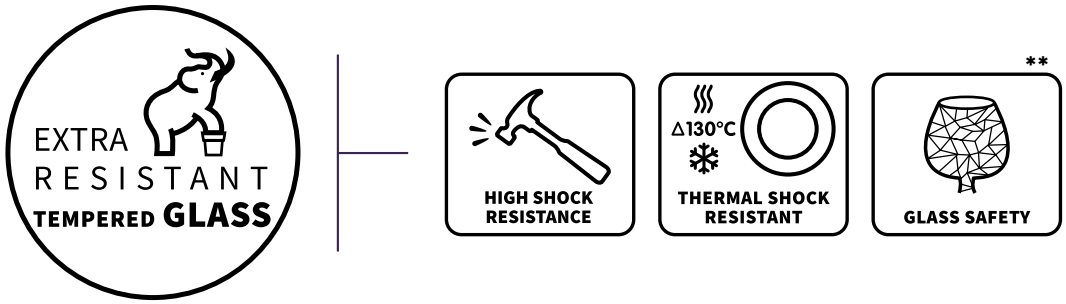

Krysta™ boasts extreme, long-lasting brilliance.
After 2,000 professional dishwasher cycles, Krysta™ is **as brilliant and transparent as ever.**
• **Glasses that bring a special brilliance to your tables.**
• **Dinner services with lasting sparkle that you will be using for a long time.**

PERFECT ACOUSTICS

Krysta™'s exclusive composition gives it **a clear, pure sound** in keeping with the tone of the finest crystals.
• **The allure of Krysta™: A unique shine coupled with a distinct sound for a refined sensory experience.**

FULLY TEMPERED GLASS

For professionals, breakage problems are a regular occurence.
In order to increase the lifetime of product by 10 to 50 times, in 1958, our research and development center developed and perfected since then, a technical process known as « tempering ».
This process provides products with excellent resistance to heat and mechanical shock.
Our items are fully tempered.

Savings in terms of budget and restocking costs:
a tempered glass can be up to 5 times more resistant than an item that has not undergone any specific treatment process.

Tempered products resist to temperature variations till 130°C:
they can thus be removed from the oven (or from a salamander) and placed directly in cold water without the risk of breakage.
*except for So Urban - thermal schock resistance 110°.

Completely safe for table service*:
when a shock or series of shocks manage to rupture the exterior shell of the tempered glass, the resulting glass shards are not sharp to the touch*.
*According to the thickness. Cannot be applied to tempered Opal.

Tempered OPAL products resist a difference in temperature of 135°C. They can make the transition from cook to chill without breaking

PROFESSIONAL 2000 CYCLES

Excellent resistance of the surface and decoration after 2,000 industrial washes

HEAT MANAGEMENT

Heat retention levels as high as other materials on the market, such as porcelain

MICROWAVE SAFE

Can be handled without burning after microwave use

OPAL - COMPLETELY OPTIMISED FOR HEALTHCARE AND CATERING
